

Airperse

Airperse is our range of anionic polyacrylates, ideal for cleaning and detergency applications.

Airperse polyacrylates are efficient dispersing agents which provide considerable reduction in incrustation. They also help keep soil redeposition on fibres to a minimum.

| | Airperse 3000 | Airperse 5000 |
|--------------------------|---|---|
| Description | Sodium polyacrylate | Polyacrylic acid, partially neutralised |
| Appearance | Clear, colourless to pale yellow liquid | Clear, colourless to pale yellow liquid |
| Specific Gravity at 20°C | 1.250 - 1.350 | 1.250 - 1.350 |
| pH (neat) | 7.0 - 9.0 | 7.0 - 9.0 |
| Ionic character | Anionic | Anionic |
| Non volatile solids, % | 42 - 46 | 38.0 - 42.0 |
| Freezing point, °C | 0 | 0 |
